Yelena Goldin, Reviewer

SOURCE ID: 21-185-00042

AGENCY INTEREST: 35684

ACTIVITY: APE20070001

**SOURCE DESCRIPTION:**

On May 15, 2007, the source has applied to the Division for the operation of a facility in La Grange, Kentucky for the manufacturing of a prefabricated metal components.

The process consists of assembling portions of the conveyor or ramp, painting the assembled portion and shipping to destination for final assembly. Since highest potential VOC emission is below 100 TPY, there is no cap limit for this criteria pollutant. The company took limits on single HAP and combined HAPs to be classified as a conditional major source. HAP emissions shall not exceed 22.5 for combined HAPs and 9 tons for any single HAP during any consecutive twelve (12) month period.

**PUBLIC, EPA, AND AFFECTED STATE REVIEW:**

On August 23, 2007, the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in *The LaGrange Oldham Era* in La Grange, Kentucky. In addition, notification of the issuance of the draft permit was sent to the U.S. EPA on August 17, 2006 via e-mail. No states are affected by this permit action. The public comment period expired 30 days from the date of publication. No comments were received during this period. The permit is now being issued final.
